

RF Bias Tee BT4000-A series

* Test label shown

DMCRF's BT4000-A series RF Bias Tees are engineered to meet the demanding test and manufacturing requirements of today's RF and microwave environment. The **BT4000-A** bias tee series comes in a wide range of electrical parameters with superior performance. They have proven reliability to satisfy the most demanding requirements. Low cost, high quality workmanship, extensive selection along with low insertion loss and group delay are only but a few attributes of the BT-A series RF bias tees.

Choose **DMCRF's BT4000-A** RF bias tees for your design, prototyping and test needs.

Model #	Freq range	Ins. Loss (typ)	VSWR	DC Current Max	Voltage Max
BT4000-A	400M - 4GHz	1 dB	1.5	0.5 amp	50 Vdc
